- ●●●○ MySql, noSql
- ●●●○ Git

PROFILE

Highly motivated and detail-oriented, with a Bachelor's in Information Technology, eager to apply academic knowledge in a practical, fast-paced environment. Skilled in Java and MySQL, with hands-on experience from academic projects focused on backend development and database management. Seeking an entry-level role as a Back-End Developer where I can contribute, grow, and continue learning.

EXPERIENCE

School Projects

Appointment Form   2023 – PRESENT

- Developed an appointment form integrated with a Firebase database to manage and streamline scheduling efficiently.

- Designed and implemented APIs to facilitate secure and seamless communication between the frontend and backend systems.

Capstone Project

- **Android-based External Disease Identifier**

- Develop an Android-based mobile application that integrates machine learning capabilities to provide a reliable and accurate pre-diagnostic tool for identifying external diseases present in patient. By harnessing the widespread availability of Android devices, this project seeks to democratize access to advanced pre-diagnostic technologies, bridging the gap between innovative solutions and their practical application in various settings, including laboratory and resource-constrained areas.d External Disease Identifier
